PRIMAL RAGE™

The Story

Eons ago, before humans walked the planet, there was rage.

Life on Earth was complex, as were the instincts of the planet's life-forms. In order to grow and multiply, there was a delicate balance between the desperate need to protect one's own life and the need to feed off the life energy of the others. As these instincts evolved, so did the gods.

These gods embodied the spirits of Hunger and Survival, Life and Death, Insanity and Decay, and especially, Good and Evil. They took the form that most suited their needs and fought countless battles on the primordial frontiers of the Earth. Life on Earth slowly multiplied, and the gods became more powerful and their battles more intense. When life had spread to all corners of the Earth, the skies shook and the Earth trembled with the fevered pitch of the god's battles. Dinosaurs were the dominant animals on land, and great forests covered almost all available space. New life forms evolved at a rapid rate, and civilizations emerged.

Then the delicate balance was disrupted. Balsafas, a great wizard from a parallel dimension, recognized the threat Earth would soon pose to the rest of the galaxy. To stop the threat, he planned to destroy the balance between the gods. Lacking the power to kill a god outright, he instead banished one to an isolated rock tomb in the center of the moon. This caused an immediate disturbance in the balance of power, followed by a huge explosion that blanketed the Earth with a huge cloud of volcanic dust. Most of the life on the planet died, and the surviving gods were sent into suspended animation.

Now, millions of years later, a meteor collides with Earth, and its destructive fury rearranges the continents and destroys the cities. Humans survive, but technology is wiped out. The fury of the Cataclysms is enough to awaken the imprisoned gods. The gods emerge to find the Earth they knew is gone. It is now the new Urth. The gods are awake, and they are angry. Get ready for Rage!

General Controls

This manual refers to following controls:

Control Reference

Throughout this manual, Dino fighting moves and special moves are referred to in combinations of button pushes and multiple Control Pad directions. Use this reference to refine your button and Control Pad presses.

Buttons:

- Y Button** = Upper Quick (1)
- X Button** = Upper Fierce (2)
- B Button** = Lower Quick (3)
- A Button** = Lower Fierce (4)
- L Button** = Upper Quick (1)
- R Button** = Lower Quick (3)

Control Pad:

- D** = Control Pad Down
- U** = Control Pad Up
- T** = Control Pad Toward your opponent
- A** = Control Pad Away from your opponent

For Example: "Hold Buttons X+Y and Control Pad T/A" = Hold Buttons X+Y simultaneously and Press Control Pad Toward then Away from opponent

Note: Both T(oward) and A(way) **Control Pad** movement are actually **Left** and **Right** directions depending on which side your opponent is located.

Start/Options Menu

At the main title screen, press the **START Button** to go to the Start/Options Screen. Press the **Control Pad Up or Down**, then press any button to select one of these two options:

START - When you select this option, you'll go to the Game Type Screen that consists of the following options:

1P(layer) Game - This option takes you to the Dino Select Screen (see **Dino Select**, pg. 10). You'll then select one of the seven available dinosaurs to fight for Urth domination. You'll face each of the other 7 dinosaurs in their home territory.

1P(layer) Training - Select this option if you want to practice the game's various bone-crushing moves and dinosaur fighting tactics. You'll go to the Dino Select Screen (see **Dino Select**, pg. 10), and select the dinosaur you want to train with. You'll also select the opponent you wish to face.

2P(layer) Game - Each player selects a dinosaur at the Dino Select Screen (see **Dino Select**, pg. 10). The game ends when the world has been dominated by a player, or a player runs out of or doesn't use a CONTINUE.

2P(layer) Handicap - This option lets you adjust your damage to any amount you want. The default is set to 100%. It can be set anywhere between 50 - 150%. The strategy is to give a less experienced player more damage to compete longer against an experienced player. Experienced players should set a percentage, and beginners should set their percentage higher.

OPTIONS - Select this option to go to the Options Screen, and make various changes to your gameplay. At the Options Screen, press the **Control Pad Up or Down** to move the flashing arrow next to the option you want to change. Press **Left or Right** to cycle through the choices. Press **Start** to exit menu. Here are the options:

Credits - This option allows you to set the game to allow from 1 to 20 game credits (continues). As you get better at *Primal Rage*, you can set this option to a lower setting to create an even greater challenge.

Round Time - Each bout has a set time in which the winner must be determined. You can set the game's bout time to challenge your opponent to get a quick kill. The round time can be set from 30 to 80 seconds in 5 second increments. The default is 55 seconds. As you improve your fighting and accomplish quicker kills, set this option lower to put the pressure on you and your opponent.

Rounds - You can set the number of rounds you'll fight your opponent before the winner is determined. Select **3** for a best two out of three, and **1** for a one time winner-take-all rage. If there is a tie, the game will go into Sudden Death. If there is tie in Sudden Death, both players lose the battle.

Difficulty - You can set the game's difficulty level from **1** (easiest) to **16** (most difficult). Default is **7**. As you improve your fighting skills, you can set the difficulty level to a higher setting.

Note: At levels 1-6, you cannot go to Final Battle in the 1 Player Game.

Game Gore - Select **Y** or **N** (default **Y**). If **N** is selected, there is no blood, eating people or fatalities. This includes the refuel round that occurs before the Final Battle in the 1 Player Game. Instead of refueling, you will receive an additional 50% power to your Life Blood Bar.

Reset High Score Table - Choose either **Y** or **N** (default **N**). If you select **Y**, the game will reset the High Score Table.

Restore Factory Default - Choose either **Y** or **N** (default **N**). Select **Y** to return all options to their default settings.

Sound Test - Sample the games' various sounds and music by pressing the **Control Pad Left or Right** to cycle through the numbers. Press any button to listen. Press the **Start Button** to return to the Options Menu.

Modify Controls - Press the **Control Pad Left or Right** to cycle through the various choices and make adjustments to your button configuration. The new configuration will be displayed. When you find the setting you like, press the **START Button** to return to the Options Menu.

dino Select

After you've selected your game type and set your options the way you want, you'll need to select your character. Press the **Control Pad Left** or **Right** to highlight the dino you want, then press the **START Button** to select. A Dino match up screen will appear for a moment, then you'll begin the Rage.

RAGE!

Now that the preliminaries are over, get ready to Rage! The main rage screen displays each dino's name, a red Life Blood Bar, a yellow Brain Stem Bar and a Timer. Various other functions appear on-screen during each Rage. Read the

following to familiarize yourself with Primal Rage:

Life Blood Bar - The red Life Blood Bar is displayed behind your dino's name in the upper right or left side of the screen. It diminishes as you take on damage, and the match ends when one dino's bar has been depleted.

Brain Stem Bar - This yellow bar is located below the name and indicates your dino's brain strength. When the yellow bar is depleted, you dino will appear dazed and vulnerable - but not beaten. You can snap out of the daze by moving the **Control Pad** quickly **Left** and **Right**, or when your opponent nails you with one of the various moves.

The Timer - There are various time settings you can set your Rage to (see **Options**, pg. 9). Each bout is timed. When the timer winds down to 10 seconds, the remaining seconds will begin to beep. This is your warning that the match is about to end. If time runs out before a dino is beaten, the earth will lift both combatants into the air. The dino with the most life remaining will win the Rage.

Win Icon - Each time you win a bout, an icon will appear on the winner's side under the timer. Depending on how you have set Rounds (see **Rounds**, pg. 9), the winner of the bout will have to accumulate 1 or 2, icons.

Hit Combos - During each rage, dinos can inflict heavier damage to their opponent with multiple hit combos. The more hit combination moves you connect on, the heavier the damage you'll inflict. When you put a nice hit combo together, it will appear on your side of the screen (Left side for Player 1, Right side for Player 2).

domination of the Urth

Each time you win a Rage in Game mode, the Urth Screen appears and tells you what portion of the world you have conquered. Continue to win your Rage bouts until you have conquered all lands. Once you have conquered the Urth, your chosen dino will take on all other dinos one-at-a-time in The Final Battle Ground (Difficulty setting 7 or higher). There is no timer, and your Life Blood Bar is not reset, so you'll have to dispose of your enemy as quickly as you can. If you have set the game to allow continues (see **Options**, pg. 9), you may choose to continue the game if your dino is beaten.

REFUELING

In the 1 Player mode, at the difficulty level of 7 or higher and Gore is set to Y (see **Game Gore**, pg. 9), you will need to refuel your dino for the final battle. This process takes place only after you've defeated all other dinosaurs. To refuel, you will have to eat as many worshippers as possible in 20 seconds.

DINO PROFILES & MOVES

Read the following profiles to get familiar with each of the dinosaurs available in *Primal Rage*. Button references in each profile are listed as numbers. Numbers 1 through 4 refer to buttons on your controller. (See **Control Reference**, pg. 7, for a rundown of Control Pad and controller button descriptions).

armadon

For over a million years, Armadon dwelled in his cave beneath the Earth's crust, telepathically linked to the biomass. The Cataclysms and the battles for supremacy over the changing planet tortured him. Now, he has risen to settle things once and for all.
