ULTRA PLAY

Ultra Plays can be used by the six teams on the Ultra League, or any edited teams based on these six teams. Each team has a certain number of Ultra Points. Each time an Ultra Play is used, a number of Ultra Points are used up. When all the Ultra Points are used up, that team will be unable to use any more Ultra Plays. The key is to use your Ultra Plays at the right time during a game. (Ultra Points are fully restored at the beginning of each game, even in a series or season.)

[1] ULTRA HITTING

Press the **X** button to open the panel. Swing with the **A** button to use the displayed Ultra Play, or press the **B** button to cancel.

[2] ULTRA BALL

Press the **X** button to open the panel. Select the Ultra Ball with the up or down direction of the control pad. (A pitcher can have up to four different Ultra Balls.) After setting it, proceed to the regular operation to pitch. Cancel it with the **B** button before the pitcher gets set for the pitch.

[3] ULTRA FIELDING

Press either **X**, **Y**, or **B** button to use the Ultra Fielding abilities. (See P. 8)

ULTRA BATTING

There are 15 different Ultra Batting Techniques. Each Ultra Batting uses up different Ultra Points.

1. HYPER HIT U.P. 9  The batting power will double up. Even a poor batter can make a big hit.	6. INVISIBALL U.P. 3  Another incredible batting technique. The ball disappears when it's hit and reappears half way down the field.	11. SHADOW HIT U.P. 5  There are three shadows to one ball? It's very confusing. Which is the real one?
2. MISSILE HIT U.P. 5  One of the best Ultra plays! A fielder who catches this ball will be blown back to the fence.	7. METEOR HIT U.P. 2  A part of the bat goes along with the ball and knocks out the fielder.	12. HYPER RUN U.P. 8  Oh boy! He can run faster than the ball.
3. TREMOR HIT U.P. 4  This causes an earthquake when it lands.	8. SQUIRREL HIT U.P. 2  This ball moves wildly, and is very hard to catch.	13. FREAK HIT U.P. 2  This crazy ball bounces in all directions.
4. BOMB HIT U.P. 4  Only the Super Catch can take this explosive hit. Watch out! It will explode!	9. SPINNER HIT U.P. 4  Wow! What happened? The whole baseball field revolves!	14. DIZZY BALL U.P. 3  Hey, what's going on? It's out of control! The fielders move in the opposite direction of the control pad.
5. SHADOWLESS U.P. 5  The shadow of the ball disappears. It's hard to anticipate where it lands without it.	10. LEAF HIT U.P. 2  A fly ball transforms into a leaf.	15. ORBIT HIT U.P. 3  The ball revolves around the fielder a couple of times, after it is thrown.

11 ULTRA BALLS

There are 20 different Ultra Balls and 4 different Ultra Fieldings. Each Ultra Play uses up different points. The effect and control of each play varies.

1. FIRE BALL U.P. 6 When it's on fire, it speeds up to about 150 mph. 	8. SPEEDER BALL U.P. 6 You can change the speed of this ball using the up and down direction of the control pad. 	15. FLOATER BALL U.P. 4 This ball floats and swings when it changes into a leaf. The timing of this is very hard to predict. 
2. STOPPER BALL U.P. 9 The speed of this ball is variable. It even stops in mid-air before reaching the catcher. Use the "A" button to stop the ball. 	9. PHOTON BALL U.P. 8 The speed of this super fast ball reaches 200mph. 	16. MULTI BALL U.P. 3 The pitcher splits into 4. Watch out! 
3. PHANTOM BALL U.P. 3 This ball disappears at the halfway point and reappears right by the batter's box. 	10. ZIG ZAG BALL U.P. 3 This ball weaves to the right and left, and is difficult to focus. 	17. FADEOUT U.P. 5 The pitcher disappears! Where and when is the ball pitched?? 
4. SNAKE BALL U.P. 3 The ball winds its way to the catcher. 	11. SPIRAL BALL U.P. 2 This ball moves in a spiral motion. 	18. WARP BALL U.P. 3 This ball warps! It can be used one time only with the "A" button. 
5. NINJA BALL U.P. 3 This ball multiplies to confuse the batter. Which is the real one? 	12. JUMPER BALL U.P. 5 This ball jumps to the right and left. Use the "A" button to control. 	19. LOTTA BALL U.P. 5 Multiple balls. Which is the real one? 
6. SPARK BALL U.P. 4 This ball discharges electricity while it weaves to the catcher. 	13. TREMOR BALL U.P. 2 This ball causes an earthquake upon impact. 	20. ??? BALL U.P. 1 This ball comes out either red or black. If the ball is black, it's an iron ball, if red, it makes a big hit. 
7. IRON BALL U.P. 5 This ball transforms to a shotput. It is extremely hard to get a hit. 	14. CHANGE-UP BALL U.P. 7 The speed of this ball varies. It drops down to 12mph with a press of the "A" button. Repeat as many times as you want.

TIPS — HERE ARE SOME TIPS TO ENJOY THE GAME

- 1) The stats you see on the screen during the season are only the results, not their abilities. (No growing system is available.)

- 2) In order to be listed on the best 30 Hitters / Batters, the players have to play a certain number of games. If you notice a good player not listed yet, let him play more games.

- 3) The memory capacity of this game is limited. It can save the record of only one league. If you wish to set up other leagues or create your own while the first league is playing the season, you must cancel the current season or now.

- 4) When you choose 1, 3, or 5 innings per game, it may take awhile before the player's batting AVG and ERA will be displayed.

- 5) If the top 2 teams or more have identical standings at the end of the season, a tournament style league play-off will be held to determine the winner. The game results of the play-offs will not be saved.

THE FULL-AUTO SEASON

With the FULL-AUTO SEASON, Super Baseball Simulator 1000™ lets you play out a full-season statistical simulation.

- 1) Set all the teams in the PLAY MODE to COM.

- 2) Set the entire season to COM. Go back to the MENU and set the cursor on the next game.

★ After you set the FULL-AUTO SEASON, the computer will play the season automatically for you. Leave the power on and watch the game, or check the results and the stats after each game.

★ Editing can be done during the season.

★ Sacrifice, stolen bases, and errors are not available in this mode.

★ In order to save the data when you turn it off, go back to the menu screen and keep the RESET button pressed when turning it off.
