## STARTING THE GAME \*

Insert the Game Pak into the Super Nintendo Entertainment System Control Deck and turn the POWER switch to the ON position. When the title screen appears, press the START Button to begin. If you do not press START, an instructional demo will begin. Press START at any time to return to the title screen.

When the MENU SELECT Screen appears, use the +Control Pad to make your selection, then press the START Button to continue.

## MENU SELECT

**NEW** When playing the game for the first time, or when starting a new player, select this option.

**CONTINUE** To continue a previous game, select this option to progress to the FILE SELECT Screen.

**DATA CLEAR** To delete a saved game file or all save files, select this option.

When a file is deleted (FILE KILL option), the data saved in the BEST RECORD will become a default name. If you want to delete all the data, you must select ALL CLEAR.

## MODE SELECT

**CHAMPIONSHIP MODE** This is the main mode of the game. You progress through the four circuits one after the other. NOTE: Unless your

record is 4-0 in the first three circuits, you cannot play the SPECIAL CIRCUIT (the last circuit). You can retry a circuit as many times as you want until you achieve a perfect record (four wins, zero losses).

**TIME ATTACK MODE** Select the opponent of your choice to try to improve your time record. You may only select opponents from the circuits you have already cleared in the Championship Mode.

**RECORDS VIEW MODE** Best Times for each opponent, Best Scores for each circuit and Personal Records (listing your best records) will be saved and can be viewed in this mode.

**BUTTON SETTING MODE** You can customize the punch buttons to your liking.

## CONTROLLER FUNCTIONS \*

While pressing the Y, B or A Buttons, use the +Control Pad to direct the punch to the head or body in addition to the direction that the Button is assigned.

# DEFENCE

## GUARDING

To protect yourself from the opponent's punch with your gloves

### RAISE GUARD

Press ↑ on the  
+Control Pad.

### LOWER GUARD

Do not press any direction  
on the +Control pad.

There are two kinds of attacks your opponent will use: blows to the head and blows to the body. Blows to your head can be blocked by a raised guard. Body blows can be blocked by a lowered guard. However, strong punches such as uppercuts cannot be blocked. Dodge (see below) or duck to cope with this type of attack.

Depending on your opponent, you may need to guard yourself at all times.

## DODGING

To avoid your opponent's punch by moving your body left and right

### DODGE LEFT

Press ← on the  
+Control Pad.

### DODGE RIGHT

Press → on the  
+Control Pad.

If you continue pressing ← or → on the +Control Pad, you will continue dodging for a longer time than if you only press and release. If you press the opposite direction, you return to center position.

While dodging, you cannot punch.

## DUCKING

To avoid your opponent's punch at your head by ducking your body.

### DUCK

Press ↓ on the  
+Control Pad.

Like dodging, you can continue ducking for a long period if you do not release the key. Press ↑ on the +Control Pad to return to the neutral position.

You cannot duck a Body Blow.

While ducking, you cannot punch.

NOTE: Depending on your opponent, dodging may not be effective. Ducking out of the way might be the only effective defence. To avoid your opponent's punch, effectively block, dodge or duck depending on the situation.

# OFFENCE

## NORMAL PUNCH

There are four kinds of punches. Each of them uses combinations of the left and right punch buttons and the +Control Pad.

### LEFT JAB

Press ↑ and the Y Button to direct a punch from your left glove to your opponent's face.

### RIGHT JAB

Press ↑ and the B Button to direct a punch from your right glove to your opponent's face.

### LEFT BODY BLOW

Do not press any direction and the Y Button to direct a punch from your left glove to your opponent's body.

### RIGHT BODY BLOW

Do not press any direction and the B Button to direct a punch from your right glove to your opponent's body.

Your opponent can usually block your punch, unless you aim where his gloves are not.

Each punch has different power and speed.

During Power-Up (See page 9), your gloves will flash and the speed of your punches will increase.

Depending on your opponent's current stance and how his guard is held, only a left or right punch aimed at the head or body can hit him. Watch your opponent closely and use the correct punch.

## KNOCK OUT PUNCH

When the (S mark) flashes, you can use any of the four powerful Knock Out Punches by combining the Knock Out Punch Button and the +Control Pad.

### UPPERCUT

Press ↑ and the A Button to direct a KO punch to the head.

### RAPID UPPERCUT

Press ↑ and the A Button twice to begin rapid punching to the head.

### HOOK

Do not press any direction and the A Button to direct a KO punch to body.

### RAPID HOOK

Do not press any direction and the A Button twice to begin rapid punching to the body.

When a normal punch (Jab or Body Blow) hits the opponent, the Power Meter at the bottom of the screen will increase. When the Power Meter is full, the S mark will begin flashing. Only then can you use a Knock Out punch.

When you are hit by your opponent's punch, your Power Meter decreases and you become unable to use a Knock Out punch.

Knock Out punches have a slight delay. However, they are a powerful enough to penetrate your opponent's guard.

If you quickly press the A Button (Knock Out Punch Button) twice, you can use the Rapid Punch (turbo Knock Out Punches!). This attack has less power than a normal Knock Out Punch, but you can continuously hammer on your opponent at high speed until they either block your punches or dodge.

During Power-Up, Knock Out Punches will also increase in power.

# THE GAME PLAY SCREEN

## TIME BONUS

This will decrease rapidly as time progresses. (The initial value differs depending on the circuit.)

## SCORE

This increases with each connecting punch or when your opponent is knocked down. After the match, the Score Calculation Screen displays what type and how many of your punches connected with your opponent. You will earn an extra continue for every 50,000 points.

## ELAPSED TIME

The match starts at 0'00"00 and finishes at 3'00"00. After three minutes have passed, the match is automatically over. If you have not won when the time is over, your opponent automatically wins. You cannot win by judgment.

## CORNER MAN'S COMMENTS

Your opponent's corner man will occasionally call out instructions or encouraging words. These are special instructions for your opponent. Whilst they are displayed, your opponent will act according to these instruction. You have no corner man calling out instructions and must fight on your own.

# STAMINA METERS

These display your stamina and your opponent's stamina. When hit by a punch, your stamina decreases. When you hit your opponent, you regain a little stamina. When you have no stamina (the meter is completely blue), you will fall down.

The stamina your opponent regains after being knocked down depends on how fast you knocked him down and how much damage you have received. A quick knockdown will cause your opponent to recover less stamina. This is true for yourself as well.

When you are knocked down, if you keep pressing buttons (except the SELECT and START Buttons), you will stand up more quickly and will regain a little more stamina.

While your opponent is knocked down, if you keep pressing the buttons (except the SELECT and START Buttons), you will regain some stamina.

When you knock down your opponent using a Knock Out Punch, your opponent will regain less stamina when he stands up.

## POWER METER & KNOCK OUT PUNCH MARK

When you hit your opponent, your Power Meter increases. If you are hit by your opponent's punch, your Power Meter will decrease. If you are knocked down, it will empty.

When the Power Meter is at maximum, the Knock Out Punch Mark will start flashing and you can use a Knock Out Punch.

# POWER-UP

To use a Knock Out Punch, your Power Meter must be at maximum. Your power builds as the time passes. As it does, the background colour behind the face at the upper left corner of the screen turns from blue to green to yellow and finally to red. When the power is at maximum, the background will begin flashing. While flashing, you are in the Power-Up condition. While Powered-Up, your normal punches have more speed and Knock Out Punches have more power. During Power-Up, your gloves will also flash.

When your power is at maximum it will remain that way even if knocked down. However, if knocked down after Powering-Up, your power will be lost.

In the default setting, Power-Up begins automatically when your power is at maximum and you throw a punch. You can change the setting from Auto to Manual in the Button Setting Mode. Manual Power-Up lets you choose when to start Power-Up with the push of a button, when your power is full (when the background is flashing).

# RULES & ADVICE

## NINTENDO VIDEO BOXING ASSOCIATION RULES

- Matches are three minutes in length.
- If a fighter is knocked down and cannot stand up before the count of ten, it is a Knock Out (KO).
- If a fighter is knocked down three times in one match, it will be ruled a Technical Knock Out (TKO), and the other fighter will win.
- If neither fighter is knocked out before time expires, the match is over and the challenger automatically loses.
- There are no illegal moves or punches.
- If you lose, you can rematch as many times as you have continues left. You will earn an extra continue every 50,000, 100,000, 150,000 and 500,000 points. Once out of continues, you must re-challenge all boxers in your current circuit.

## ADVICE (HOW TO WIN THE MATCH)

Watch your opponent's movements closely. Most opponents will telegraph their intentions before attacking.

Dodge & Punch and Duck & Punch are the most basic combinations. Try to avoid your opponent's punch and quickly throw a punch of your own. If your timing is perfect, your punch will often cause your opponent to become dizzy and drop his guard. This is the best chance to use punch combinations.

Try to minimize the damage you receive. Try to build up your Power Meter and keep it at maximum so that you can use a Knock Out Punch at any time.

Do not be careless after you knock down your opponent. When your opponent stands up, he might come at you with a special attack.

Although you should be paying attention at all times during the match, be extra careful when instructions are called out from the opponent's corner man. The comments are different for each fighter. There are mainly two types of instructions, one is about how to fight, the other is about specific attacks. Some corner men will call out more than one instruction to their fighter. (However, only one instruction is displayed at a time.)

Try to fight with purpose, not by chance. When your opponent is knocked down in an unexpected way, or when your punch hits your opponent with unexpected timing, try the same attack again, many times. You might find a pattern that will severely damage your opponent.
