THE STORY

The story of **New Horizons** takes place during the Age of Exploration. This time period was marked by the great technological advances in shipbuilding and navigation which spurred explorers to travel across the world's seas. The discovery of new lands offered explorers tremendous opportunities for adventure, wealth and fame. As a result, major European countries sought new territories and wealth as they entered a fierce competition to establish strategic strongholds in Africa, Asia, and the New World.

New Horizons begins in 1522, the year that Magellan's crew returns from its unprecedented around-the-world voyage. The amazing journey seems to prove that the earth is round, yet many still remain skeptical of this view. With the lack of a reliable mapped chart of the entire world, extensive exploring ventures will be contracted out to able, adventuresome sailors. Most of the world is just waiting to be discovered. As an ambitious young hero or heroine, sail the seas and unveil the earth's secrets!

VICTORY AND DEFEAT

Your victory goal will differ depending on the hero or heroine you play. Regardless, you must gain significant fame in the Adventure, Piracy, or Trade career that you pursue, and go through a series of exciting events to achieve your final goal. For a general game flow, see **Path to Success**.

You will lose when:

- A. Your flagship sinks or loses its ability to sail.
- B. You run out of provisions and lose the entire crew.
- C. You are defeated in a battle or duel.
- D. You fail to achieve your goal by January 1554.

Joao Franco

The son of Portugal's Princess Chris and Duke Leon Franco. As an adventurer, he travels around the world for the glory of Portugal to find the secrets of the lost land of Atlantis.

Portugal (King: Manuel I, Capital: Lisbon)

Since the Treaty of Tordesillas in 1494, Portugal has claimed sovereignty over new lands east of 46°W longitude. Although Portugal has established a sea route to India through

West Africa, it is searching for a new route to East Asia due to the sailing dangers of the existing route.

Catalina Erantzo

Female pirate from Spain. She leaves the Navy for a life of piracy to seek revenge on the Portuguese for the mysterious loss of her brother and fiance.

Spain (King: Carlos I, Capital: Seville)

Since the Treaty of Tordesillas with Portugal, new lands west of 46°W longitude are claimed to be Spanish territory. Seizing the Americas, the Spanish Kingdom has just conquered the Aztec and is now planning to attack the Inca. Some Caribbean ports are already Spanish allies. The Spanish Navy is viewed as a menace to other European countries.

Otto Baynes

British privateer. He is on a secret royal mission for King Henry VIII to defeat the Spanish Navy.

England (King: Henry VIII, Capital: London)

Exhausted from the Hundred Years War and War of the Roses since the 14th century, England has been left behind in the search for new routes by the Portuguese and Spanish. It is becoming hostile towards both Spain and Portugal.

Ernst Von Bohr

Dutch geographer. Hired by his cartographer friend Mercator, he sails to far-off lands to plot out a detailed map of the entire world.

Holland (Ruler: Governor-General, Capital: Amsterdam)

A rising power of sea transportation, Holland has expanded its influence as a link between the West and East. Holland's recent economic development has enabled its participation in the power struggle in the Atlantic.

Pietro Conti

Italian adventurer. He roams the world in search of hidden treasures and the unknown to pay for the debt his father left him.

Italy (Ruler: Governor-General, Capital: Genoa)

Italy consists of several city states and is governed by the governor-general who was elected by citizens. Italy has started declining since the discovery of the new world and shifting of trade from the Mediterranean to the Atlantic. The two powers on the Iberian Peninsula are its rivals.

Ali Vezas

Turkish merchant who grew up as an orphan in poverty. A twist of fate brings him a merchant ship, which spurs his ambition to make a fortune.

Ottoman Empire (Sultan: Suleiman II, Capital: Istanbul)

Ottoman Empire is an Islamic nation ruled by a young sultan. It has maintained an aggressive expansion policy as seen in the capture of the Balkans and parts of eastern Europe from the Christendom. The recent advance of Portugal in Asia is threatening the empire's sovereignty in the East.

THE WORLD OF NEW HORIZONS

In the world of New Horizons, you can explore ports, villages, shore, and sea. You have four sets of commands which are available under different conditions. See later chapters for explanations.

Commodore's Commands (Port and Sea) **Battle Commands (Sea Battle)**
Port Commands (Inside Buildings at a Port) **Sea Commands (Sea)**

TIME

Each day has 24 hours. Time will elapse as you sail the ocean, battle on the sea, and enter buildings at port. Each building at a port has different business hours. See **Port Commands** to know when a business is open. When you check into a lodge, you may stay there until the next morning or anytime you like.

At sea, you will not see the time unless you have a pocket watch (Voyager's Aid item). However, the slight changes of ocean color will tell you whether it is day or night. You cannot start a naval battle at night. All battles will end at 9:00pm sunset.

YOUR RELATIONS WITH COUNTRIES

Gain allied ports and defeat rival fleets to strengthen your ties with your country and improve your 'friendship' level. However, these patriotic acts will adversely affect your friendship with rival countries. If your friendship level becomes negative (displayed in red) with a country, you may be denied entry into the country's allied ports. If your friendship with your home country drops below 0, you may lose your rank or even your nationality! Be careful not to make too many enemies!

If you find your entry into a port blocked by unfriendly officials, wait until it gets dark. Under the cover of darkness, you can sneak into the port, and even sleep at the lodge. You will be safe from the officials, and even be allowed to trade.

STRUCTURE OF YOUR FLEET

Your fleet consists of a flagship and up to nine other ships. The flagship is your command post from which you will issue direct orders. Your first mate, bookkeeper, chief navigator, other navigators and crew will join you on the flagship as well. Other ships will have a captain and a crew on board.

There are two types of support personnel who travel with you: mates and crew.

MATES

Your assistants who help you lead your crew. You can recruit mates in the cafe and lodge. Appoint them to suitable positions listed below. Each mate is paid at the beginning of each month. Mates dissatisfied with their wage may become disloyal and resign, unless you raise their wage.

FIRST MATE

Your right-hand man. If your first mate has the skill of Celestial Navigation, you can use the Auto Sail command.

BOOKKEEPER

Person in charge of Accounting for the fleet. Appoint a mate with the Accounting skill to this position. Your bookkeeper will tell you whether a market price is reasonable, and which port gives the best buying price for a particular good (See the Commodore Command **Cargo-Log of Goods**).

CAPTAIN

Commander of the ship. The captain of the flagship is the commodore, who is yourself in your fleet.

CHIEF NAVIGATOR

Leader of navigators. The chief navigator will gain more experience than other navigators, while employed in this position.

NAVIGATOR

Mates who are not in any of the above positions. New mates will board the flagship as navigators. When you add a ship to your fleet, its captain is automatically selected from the navigators.

CREW

Ship workers who do the manual labor of sailing and fight in battles. Recruit crew in a cafe (See the Port Command **Cafe-Recruit Crew**). You must assign new recruits to the following three tasks:

NAVIGATION

Navigate a ship. If fewer men are assigned to navigation than the minimum number required for the ship, its sailing speed will slow down.

LOOKOUT

Watch the horizon for ports and fleets. The more men you assign to Lookout, the farther you can view at sea to discover ports and villages.

COMBAT

Fire guns and battle enemy ships with hand-to-hand combat.

PATH TO SUCCESS**COLLECTING INFORMATION**

Collect information and seek clues for your quest.

AT THE CAFE AND LODGE

Talk to fellow seafarers. Treat them to find food and drinks, to get useful information from them. Sailors looking for a job may agree to become your mate. Waitresses are also a good source of information. Tell them about your discovery stories and give them precious treasures. They may help you find important clues.

ON THE STREET

Talk to locals and find out the historical background and specialty of the port, tricks to smooth sailing, and tips for success.

BUILDING WEALTH

With limited funds from the start and a long voyage ahead of you, you must learn how to earn gold and build wealth before you pursue your goal. It is best to carry out several wealth-building tasks simultaneously.

STEADY TRADING

Find lucrative trade routes and trade vigorously. As long as you buy low and sell high, you can make a good profit even with a small ship and limited funds.

EXCITING PIRACY

Attack fleets and seize their gold, cargo, treasure, and even ships! Sell them to make gold.

ADVENTUROUS EXPLORATION

Sign a contract with cartographers and collectors who will pay for your geographical and discovery information about distant lands.

MISSIONS FROM GUILD

Guilds are always looking for people who can undertake tasks such as

delivering a letter and buying goods for someone. Your reward increases for more challenging tasks.

DEBT FINANCING

Borrow money from the bank to increase your funds. Remember to repay your debt quickly since you are charged a 10% monthly interest.

SEEKING FAME

The news of your accomplishments spreads fast and earns you fame. Fame is the key to raise your rank and reach your goal. The following explains fame in three areas:

Fame	How To Gain The Fame
	Fame in Trade <ul style="list-style-type: none"> Increase allied ports for your country. Accomplish guild missions except for pirate hunting.
	Fame in Piracy <ul style="list-style-type: none"> Defeat fleets. Hunt pirates for a guild. Collect debt for a guild.
	Fame in Adventure <ul style="list-style-type: none"> Sell information to collectors and cartographers. Discover ports and villages outside of Europe. Collect debt for guild.

RISING IN RANK

As your fame increases, you may be invited to the Palace by the king or governor-general and given a royal mission. When you succeed in carrying out the mission, you will be awarded with a new rank. There are nine ranks:

COMMODORE'S LOGBOOK

FLEET DATA

(1 - 100) Commodore's Navigation Level.

(1 - 100) Commodore's Battle Level.

(0 - 100) Ease of Tacking and maneuverability of the fleet. Set by the ship with the poorest tacking ability in the fleet. A fleet with a high tacking ability can turn quickly and move faster against headwind, but a low tacking ability limits the fleet to sail only straight.

(0 - 100) The fleet's Power to move forward. Set by the ship with the poorest power in the fleet.

(0 - 100) Durability of the hull of the vessel. Long voyages, storms, and battles will wear out the ship and lower its durability. When the value drops to 0, the vessel will sink!

Total number of crew in your fleet. A larger crew will help you sail smoothly, but it will consume provisions faster.

Total number of Guns on your fleet.

Battle abilities of your fleet.

SHIP DATA

Navigation

Lookout

Combat

Number of your crew assigned to the tasks of Navigation, Lookout, and Combat. The number of navigation crew will be red if it is fewer than the minimum required for the ship.

Current cargo load/maximum cargo capacity of the ship.
Cargo Capacity = Current Cargo + Water + Food + Lumber + Gunpowder (+ Remaining Capacity). A large cargo load will slow down the ship.

Speed of the ship in knots. A larger navigation crew and less cargo will increase the speed.

Type of **Figurehead** installed on the ship.

Type and number of **Guns** equipped on the ship.

Barrels of **Water** on the ship.

Barrels of **Food** on the ship. Essential for a healthy crew.

Barrels of **Lumber** on the ship. Necessary to repair ships.

Barrels of **Gunpowder** on the ship. Necessary to use guns.

(1 - 100) Ease of **Tacking** of the ship.

(1 - 100) **Power** of the ship to sail forward.

(1 - 100) **Durability** of the hull of the ship.

Current load / maximum total capacity of cargo, crew and guns. Total Capacity = Cargo Capacity + Crew Capacity + Gun Capacity.

Current / maximum number of crew.

(0 - 100) **Health** of crew. Disease and rations will affect their health. You will start losing crew when this value drops below 20.

Carrack

MATE DATA

Navigation level (1 - 100) / Navigation experience.

Battle level (1 - 100) / Battle experience. Only captains gain battle experience in battle.

	Battle Level rises	Captain: Advantage in battle.
	Battle level rises	Captain: Advantage in battle.
		You/Captain: Advantage in trading at market and Item shop.

SKILLS

People with specialized skills were highly valued in the time of exploration. Learn new skills such as Cartography, Celestial Navigation, and Gunnery. You may recruit skilled mates, but you will not know what skills a prospect has until he joins you.

Celestial Navigation. This skill allows you to sail to a specific point on the map by observing the position of stars. If your first mate has this skill, you may use the **Auto Sail** command. If your captain has this skill, his ship will sail faster. You may learn Celestial Navigation at an astronomer's house, when your Seamanship≥70, Knowledge≥80, and Intuition≥70.

Cartography. This skill allows you to sign a contract with a cartographer who will pay for information on distant lands. If your Seamanship, Knowledge, and Intuition are all above 75, you may learn this map making skill at a cartographer's studio.

Gunnery. This skill improves your firing accuracy in battle. If your Leadership≥75, Knowledge≥65, and Courage≥80, you may learn this skill at a strategist's house.

Accounting. This is an essential skill for bookkeeping. You cannot learn this skill, so find a mate with this skill and make him your bookkeeper. A bookkeeper can tell you the port where the best price is for different goods. See the Commodore Command **Cargo-Log of Goods**.

Negotiation. If you or your bookkeeper have this bargaining skill, you'll be able to buy ships and goods at the lowest price. You cannot learn this skill.

RANK/WAGE

Your rank and mates' monthly wage. Wages are paid on the first date of each month.

HERO DATA

In a few ports, the production of a local specialty is so small that it may not yet be sold in the market. Invest in such a market and develop its economy until the local specialty is put out in the market. You will be able to make a good profit from trading these local goods.

- ⑦ Port Industry / Amount Invested (1 - 50,000 gold per month)
Invest in a shipyard to foster the port industry. Ports with an advanced industry will offer a better selection of new ships at the shipyard.

Buy goods. The selection and price of merchandise differ in each port. You must pay a 20% tax on top of the price unless you have a tax free permit from a country allied with the port.

Tax Free Permit: Tax free permit gives you the privilege to enjoy taxfree shopping in the market! It is issued by the ruler of a country, at the palace in the capital port. It is valid for six months in allied ports (See Palace-Meet Ruler-Tax Free Permit). The permit is very expensive, so make sure that your potential tax savings outweigh the cost. If you do not trade often, the permit may be too costly. Remember, you must have a rank to enter the palace.

TREAT

Treat a selected sailor with the cafe's specialty. Lavish the soldier repeatedly to encourage him to reveal more about himself.

GOSSIP

Get information about other sailors.

HIRE

Ask a sailor to become your mate. If he turns down your offer, treating him to food or drinks may be an effective recruiting technique to change his mind. Negotiate sailor's wage by rejecting a high wage request with the hope that he will accept a lower wage next time you try to hire him. You cannot recruit a sailor who already has a job.

GAMBLE

Play a card game of Blackjack, or Twenty-one, with sailors. You may bet 10 to 500 gold pieces. In New Horizons, you will play blackjack against one person only. Your goal is to draw cards and have a count higher than your opponent's, up to 21, without exceeding it. If you draw cards with a count higher than 21, you will automatically lose. If both you and your opponent have the same count, you will lose.

Blackjack Commands:

HIT Draw a card.

STAND Stop drawing cards and make the current count final.

Card Counting Rules:

- 2 to 10 They each count as it is.
- J, Q, K Jack, Queen, and King. They each count as 10.
- A Ace. It counts as 1 or 11, depending on other cards you have. For example, A-9 is 20 as A can be counted as 11, but it can be also 10 if A is counted as 1. A-4-K-3 can total 18, if A is counted as 1.

House Rules:

Following are special house rules that give you extra gold!

Name	Stakes	Combination	Total
Blackjack	Double	A and J, Q, or K *	21
Triple Sevens	Triple	7-7-7	21
Sequence	Triple	6-7-8	21
Five Cards without exceeding 21	Triple	A-2-2-7-6 (Example)	18
Redjack	Five Times	Heart A and Heart J	21

* A and 10 are not considered a blackjack in this game.

GUILD (4:00AM - 7:00PM)

JOB ASSIGNMENT

Undertake a mission for reward. You may carry out only one mission at a time. When you complete a mission within the stated time, you will be rewarded and gain fame. If you fail to complete your mission, you will not only lose the reward, but also damage your fame. Be careful to select a mission which you can accomplish. If you are on a royal mission, this command may help you get a clue as to where to start. There are five types of missions:

- **Deliver Letter** Deliver a letter.
- **Buy Goods** Buy and bring a specified amount of goods.

PORT LOCATION

Pay gold and learn the longitude and latitude of a specific port as well as its approximate location on your chart.

**SHIPYARD (4:00AM - 7:30PM)****NEW SHIP**

Order a custom-made ship. There are 25 types of vessels in New Horizons, but each shipyard has a different selection. A few strong ships will become available if you invest in certain shipyards and develop their port industry. You may have up to 10 ships, including your flagship, in your fleet.

To build a new ship, first select the material for the hull: Teak, Cedar, Beech, Oak, and Copper from the lowest to highest price. Then allocate space for crew, cargo, and guns (Total Capacity = Crew + Cargo + Guns). To install a figurehead and guns on your new ship, use the **Remodel** command.

Select a ship type according to the purpose of your sailing. For instance, if you are going to engage in many battles, select a ship with good durability, tacking ability, and high gun capacity. If you are a trader, you should select a ship with a large cargo capacity and low minimum number of navigation crew.

Minimum Navigation Crew — Minimum number of crew needed to operate the ship. This number is displayed when you decide the capacity of crew after you purchased a new vessel.

USED SHIP

⚓ LOAD CAPACITY

Change the maximum capacity of crew and guns. Remember that each ship model has a set total capacity and the Total Capacity = Cargo + Crew + Guns. For example, to remodel your ship for battle use, increase the maximum crew and guns, and shrink the space for cargo. The cost depends on the ship model.

⚓ RENAME

Change the name of your ship.

INVEST (1 TO 50,000 GOLD)

Invest in the shipyard to develop the port industry. The port's support to your country will increase. Ports with advanced industry will have a capability to build stronger ships.

GOSSIP

Inquire about the mission of passing fleets. Be careful with whom you talk. Pirate fleets may attack you by surprise!

When you are attacked by a pirate, you must decide whether to fight, flee, or surrender. If you select fight or fail to flee, a battle will start. If you surrender, most of your holdings will be seized, but at least your life will be spared.

BATTLE (5:00AM - 9:00PM ONLY)

Attack a fleet and initiate a battle. See the **Battles at Sea** chapter.

AUTO SAIL

Sail to a desired port without navigating your ship! Select your destination from among discovered ports and leave the navigation to your first mate, if he has the skill of Celestial Navigation.

Auto Sail is a very useful command which saves you time and avoids tedious navigation. You can even use Auto Sail and get to a new port if you have received the exact location at the guild.

GO ASHORE

Drop anchor and visit a port or explore an unknown shore. Select a landing point with the right and left arrows of the Control Pad. Your fleet must be adjacent to a port, village, or shore.

AT SHORE

SAIL

Set sail to continue your voyage.

REPAIR

Do a quick repair to damaged ships. You need lumber to fix your ship.

SEARCH

Search for a fresh water spring. Stock your ship with as much water as you want.

If you are looking for a hidden treasure marked on a treasure map, use this command to search for the treasure.

WAIT

Wait at the shore to safely weather a storm. Press Button A to return to the shore command menu.

AT VILLAGE

SAIL

Set sail to continue your voyage.

SEARCH

Search and discover a rare or unique thing in the village. You may sell a collector the information about your discoveries (See Port Command Collector-Report). Every village has one thing to discover. But beware, you may discover an item so fascinating that your crewmen may insist that they stay in the village.

There are almost 100 discovery items in New Horizons with about 50 items which appear randomly in each game. Therefore, you can discover different items every time you play a new game.

ENTERTAIN

Entertain villagers with a banquet to develop friendship with them. Entertaining will cost 2 barrels of food.

If your search is not successful, entertain villagers to get their help. Rare items are hard to discover unless you entertain villagers repeatedly and earn their friendship and cooperation.

PLUNDER

Plunder the village to seize food. You may lose some crew members if the villagers fight back. The villager friendship level with you will drastically drop.

WAIT

Wait at the shore to safely weather a storm. Press Button A to return to the village command menu. Waiting will bring your friendship level back to 0.

QUICK SAIL (Y BUTTON)

Sail to a selected destination within sight. Move the square cursor to a desired point.

BATTLES AT SEA

A battle starts at sea when one fleet attacks another. To attack a fleet, select the Sea Command Battle. You cannot start a battle at night. Pay attention to the color of sea to know whether it is day or night. Sunset at 9:00pm will end a battle in a stalemate.

VICTORY

You will win if you meet one of the following conditions:

- Sink the enemy's flagship by reducing its durability to 0.
- Eliminate the crew on the enemy's flagship.
- Defeat the enemy commodore in duel.
- Force the enemy's flagship to flee.

FLOW OF BATTLE

PICK YOUR PREY

Before you attack, check out your target fleet with the Sea Command View. View the size and nationality of the fleet to decide whether to proceed with the attack. Remember, if you attack a rival fleet, your relations with your home country will improve, but your relations with the rival country will deteriorate (See Your Relations with Countries).

APPROACH YOUR TARGET AND ATTACK!

Once you have marked your target, approach the target fleet. Move your fleet adjacent to the enemy fleet, place it in a strong strategic position, and then attack with the Sea Command Battle. The position and direction of your fleet at the time of attack determines the initial position of your ships. Be careful not to start a battle with enemy behind your stern. If you don't have a full crew, increase your combat crew ratio just before you start a battle.

SET BATTLE STRATEGIES

When the battle begins, decide the overall strategy for your entire fleet with **Order-All**, and then give more specific orders to each ship with **Order-Individual**. When enemy ships are within your attacking range, use the **Attack** command. Use guns for distant ships or rush adjacent ships. Concentrate your attacks on the enemy's flagship, as your goal is to destroy the flagship. Destroying the flagship will earn you victory and automatically allow you to take the remaining enemy ships into your fleet. Keep your flagship away from gunfire.

AFTER THE BATTLE

If you win, you will seize the enemy's gold and cargo. You can capture the remaining enemy ships and take them into your fleet, if you have navigators who can be appointed as their captain. If the enemy defeats you before you flee, you will lose the game. If you've managed to flee, quickly go ashore and repair damaged ships before you are attacked again. Once repairs are made, go straight to a nearby port to rebuild your fleet at the shipyard.

FLEE

Flee from the battle. To flee, you must first reach the edge of the battle area. View the whole map and see how close you are from the escapable area. Be careful not to move toward land. You will have no way out!

DUEL

Duel takes place when:

- Someone attacks you at a port.
- Your flagship rushes the enemy flagship and you challenge the enemy commander to a sword fight.
- The enemy flagship rushes your flagship and the enemy commander challenges you to a sword fight.

In dueling, your goal is to reduce your opponent's body strength (blue bar) down to 0. One attacking command and one defending command make one turn and you have 10 turns to defeat your opponent. At the end of 10 turns, if both you and your opponent still have not exhausted body strength, the duel will end in a draw.

To select duel commands, you will draw command cards. Move the hand icon to one of six attacking or defending command cards and press Button A to select it. The number on each card indicates the strength of your attack or defense, ranging from 1 (weak) to 9 (strong). Once you draw one card, another card will be randomly selected to fill the space.

To defeat your opponent, you will need not only good swordsmanship and battle skill but also a high-performance sword and armor. You will also need to carefully decide your move, predicting what move your opponent will choose from his type of sword. For example, if you have a heavy

sword, it is best to Strike your opponent. When your opponent counters your attack with a fencing sword, he is likely (but not necessarily) to use Thrust. Assuming that, you may choose to defend with Parry.

Swords are classified into four categories (Straight, Fencing, Curved, and Heavy Sword) according to its shape and strong points. It is to your advantage to know what type of sword you and your opponent are using when you select a command in duel. The best way to learn the sword type of the various available swords is to browse swords at item shops.

Sword Type	Best Attack Command	Defense Command
Fencing Sword	Thrust (T)	Block (B)
Curved Sword	Lash (L)	Dodge (D)
Heavy Sword	Strike (S)	Parry (P)

— = Most destructive attack

— = Best defense

* Straight swords are not suitable for one particular attack, but are fairly good for all attacks.

GAME TIPS FOR BEGINNERS

To reach your goal quickly, you must know which career you are pursuing. Joao, Ernst, and Pietro are adventurers. Catalina and Otto are pirates. Ali is a trader. Increase your fame in your career and great events will soon follow!

FOR TRADERS

ANCHOR EARNING YOUR FIRST MONEY

The goal for traders is to make a fortune, invest money in ports, and increase allied ports for the home country. Although, your poor navigation skill and small ship in the beginning will not allow you to import exotic goods from outside Europe, you can still make a good profit by trading port specialties of lucrative trade routes in Europe, such as the one between Athens and Istanbul. **Auto Sail** is a convenient command for repetitive sailing on the same route. Use the Commodore's command **Cargo-Log of Goods** to find out the port which pays best for your goods. Make it a habit to purchase and load ship supplies before going to the market. You want to make sure you have enough cargo space and gold to purchase food, water, and lumber for your journey.

ANCHOR EXPANDING YOUR FLEET

As soon as you have saved enough gold, buy a larger vessel to trade in larger volume. With a larger merchant ship remodeled for more cargo space, you can trade tons of goods and multiply your profit quickly. Continue to buy better ships and expand your fleet as you accumulate gold. Ships with large cargo space and a small minimum crew, such as the Xebec and Carrack, are good choices for traders.

ANCHOR INVESTING IN PORTS

Invest a portion of your savings in the market and shipyard to turn rival ports into allied ports (You need to raise the port support to 75% or higher.) Your investment will develop the port economy, and as a result, you

may find a new specialty of the port in the market. New specialty goods offer substantial profit opportunities. You may also deposit excess gold in the bank for safety and interest. In the meantime, hire skilled mates, recruit crew, and prepare to sail longer trade routes.

ANCHOR SEEKING EXOTIC GOODS

When you are ready to travel to distant ports, follow **Sailing Tips for Novice Voyagers** in the following section. Sail conservatively until you feel comfortable in sailing the high seas. You will discover that cheap goods from Africa and Asia are priced extremely high in Europe.

FOR ADVENTURERS

ANCHOR PREPARING FOR ADVENTURES

At the beginning of the game, don't attempt to sail outside of Europe. As a novice, it is highly likely that you will wreck and drown. Good adventurers never fail to prepare themselves for long voyages. As a start, earn a sizable amount of gold with which you can buy supplies for your adventure. Trading is probably the easiest way. Follow the preceding tips **For Traders** of other traders and patiently continue your efforts. While trading, get a knack for navigation and spotting ports. Remember, do not forget to find a collector and sign a contract with him.

ANCHOR BUILDING A FLEET

As you increase your funds, buy ships suitable for adventurous voyages. You don't need expensive ships as long as they are durable, easy to maneuver with a small crew, and have a large cargo space for food and water. Install good figureheads. Hire skilled mates, recruit crew, and buy helpful items such as a telescope, balm, rat poison, lime juice, measuring instruments, etc.

ANCHOR EXPLORING OUTSIDE EUROPE

Once you have prepared your fleet for long journeys, you are ready to explore uncharted waters. Load as much food and water as possible on your fleet and sail along the coast of Africa or to the New World. When you've discovered a village, always land there and search for treasure.

Talk to locals and other seafarers and seek information for unknown ports. Go back to Europe periodically to report your discoveries. In the meantime, learn the skill of cartography and sign a contract with a cartographer to earn extra gold. Soon you will be able to navigate your fleet anywhere in the seven seas and complete a map of the entire world.

FOR PIRATES AND PRIVATEERS

⚓ BUILDING A MIGHTY BATTLE FLEET

As pirates plunder other fleets to earn gold and fame, battles are naturally the main activity for pirates. If you do not have enough gold to buy battle ships at the beginning, defeat merchant fleets to seize their gold and cargo as well as to gain battle experience. War booty is what makes risky battles worthwhile. The most rewarding spoils of war are ships. Upon victory, you can take remaining enemy ships and incorporate them into your fleet or sell them at shipyards. Large battle ships can bring you a substantial amount of fortune. To ensure your ability to bring the enemy ships into your fleet, you should bring less than 10 ships to battle. You also need extra mates to appoint as the captains of the new ships.

To build a superior battle fleet, select ships with a large gun capacity and excellent durability. Among the best battle ships are the Galleon and Venetian Galeass. Remodel the ships to equip them with powerful guns. Stock plenty of gunpowder on each ship. Load a large number of crewmen on your ships, especially on your flagship.

⚓ BEFORE YOU ATTACK

Battles can be perilous or joyfully thrilling depending on how you battle. The number one rule is to only attack those fleets that you can easily defeat. When you are adjacent to your target fleet and ready to attack, assign all or most of your crewmen to combat, using Commodore Command Crew-Assign Crew. Remember, you will need at least as many combat crewmen as your guns to utilize them all. For example, if you have 100 guns and just 50 combat crewmen, you can use only 50 guns. It is also important to position your fleet behind the enemy before you start a battle; you will be able to inflict more damage.

⚓ WINNING THE BATTLE

Order your ships to target the enemy's flagship while protecting your own flagship. To rush the enemy, send ships whose captains have high Swordsmanship. For gun attacks, send ships whose captains have the knowledge of Gunnery. Beware, cowardly or disloyal captains may desert you and flee. The quickest way to decide a battle is through a duel with an enemy commodore. But be careful, if you don't have enough combat men on your flagship, your attempt to challenge him may be blocked. Make sure to put on a sword and armor with the Item command before dueling. After battle, do not forget to transfer crew and readjust their task assignment. With a reduced number of crew, you may need to assign almost all of your men to navigation until you hire more crew in a port.

Galleon

SAILING TIPS FOR NOVICE VOYAGERS

The deep ocean can be more menacing than pirates. Adhere to the following tips to steer you in the right direction.

- ⚓ Load more food than water on your ships. It's possible to find a spring on a shore to replenish your water supply. You will also need extra food to entertain villagers.
- ⚓ Set the navigation crew ratio high to sail fast and smoothly. You don't need combat crew until you have a battle.
- ⚓ Buy a telescope to spot distant ports and villages at sea. Other navigation instruments, such as the sextant, are also useful to find ports if you know their longitude and latitude.
- ⚓ On the high seas, a storm will be the first challenge you will face. Install expensive figureheads on your ships to avoid most storms. To avoid damages, prepare in advance and buy Balm at an item shop. Use the Balm with the Commodore Command **Record-Item** when a storm hits, or when your mate warns you that a storm is approaching. When a storm does hit the area you are sailing, land at a nearby shore immediately and wait there until the storm calms down. Always stock some lumber in case you need to fix damaged vessels.
- ⚓ During a long voyage, rats and scurvy may trouble the crew. So keep a cat and lime juice on board. A cat will catch rats and lime juice will cure scurvy. Rat poison also works as a temporary relief for rat problems. Your entire supply of rat poison and lime juice is expended when you use them.
- ⚓ If your crew is terribly weak from sickness or the lack of food and water, you may want to dismiss the entire crew at port and hire fresh, healthy crewmen. But remember, you will not be able to hire many men at a port with a poor economy.
